

DEKALB MEDICAL 2nd YEAR RESIDENTS

Josh Lee

Hi, my name is Josh Lee. I am from Sacramento, attended undergraduate school in Riverside California and am a recent graduate of California School of Podiatric Medicine. On my free time, I like to run, work out, and when I can, I like to play golf, swim, surf and snowboard. I became a podiatrist because I saw and valued the element of humbleness that is embedded in the nature of this profession, which is something that I hope to demonstrate to my patients. To continue my medical training here at DeKalb Medical podiatry residency program is a true privilege and honor, and I am very excited to be a part of DeKalb Medical.

Sara Lewis

I was born and raised in Satellite Beach, FL. I grew up spending most of my time at the beach and on the soccer field. I was a double major at Florida Institute of Technology where I also played collegiate Division II soccer. In my free time I enjoy hiking, boating and backyard BBQs with my family. I carry an official National Park passport and am looking forward to filling it with more cancellation stamps. In the fall I spend my weekends rooting for Florida State football (GO NOLES)! I am looking forward to an exciting career in podiatric medicine and being a part of the Podiatry Institute.

Chris Martin

My name is Christopher Martin and I was born in Tennessee, but grew up in Wisconsin. I graduated undergrad from the University of Wisconsin before pursuing a career in podiatric medicine at Des Moines University. I could not be happier that I have the opportunity to complete my residency training at DeKalb Medical center! I am a big Wisconsin Badgers fan. In my spare time, if I'm not watching a Badger's football or basketball game, you can usually find me exploring the great outdoors. I especially enjoy hiking, kayaking and camping.
